Edoardo Nannotti

Software Developer • etuardu.github.io

Let's turn complex ideas into friendly apps!

Software Developer, 2016 - Present

Edukácia@Internet, Partizánske, Slovakia (Hybrid)

– Lead architecture, design and development of Retevent, a white-label multilingual virtual conference platform. Retevent hosted events like the Polyglot Gathering 2020 (1,000+ participants) and the World Esperanto Congress 2021 (1,800+ participants).
Vue.js · Vuetify · Cloud Firestore

– UX design and front-end development of TestU, a user-generated content portal for teachers, featuring a flexible exercise editor and an exam feature to collect pupils' submissions.
Nuxt.js · Vuetify

– Build apps and tools related to on-site conferences tasks. E.g. a Php/jQuery library to enable Stripe payments in legacy forms, validation of coupons through QR-code scanning, e-mail payment reminders, generation of name tags with dynamic layout.
JavaScript · Bash Script · Python · Google Apps Script · MariaDB · PHP · Svg

– Design and development of web/mobile apps. E.g. Trejnumu, an educational multilingual Android quiz app; Manifesto, an animated infographic website for the 20th jubilee of the Manifesto of Prague.
Apache Cordova · jQuery · Snap.svg

Developer consultant, Graphic Designer, 2013 - 2016

Self-employed, Lecce, Italy

– Design and development of web/mobile apps, landing pages and CRMs. E.g. Qwaste App, Tattoo Studio Cloud CRM, Lecce Air Quality.
Apache Cordova · jQuery · Google Apps Script · jQuery · Snap.svg · Python

– Provide documentation, training and live support for the users, system maintenance, customer relationship.
Client management · Communication

Software Developer, System Architect, 2012 - 2013

Rodonea s.r.l. / Widepower, Monopoli, Italy

– Creation of a client-server system to collect electric energy production data from clusters of solar power inverters for statistical and real time monitoring purpose.
Arduino · PHP · jQuery UI · .NET · Network Engineering

– Build a Modbus RS485 master device providing a REST interface to query slaves. Provide sample web apps to interact with the devices for industrial and home automation.
Arduino · PHP · jQuery UI
